

CREATE A FEELING  
OF SPACE AND  
RESPECT PRIVACY,  
THAT'S IDA

IDA, or 'Interior Doors Aluminium', answers to the **trend of minimalist interior doors and walls with tight lines that provides a distinctive appearance.** Our aluminium interior solutions are minimalist, durable (aluminium is 100% recyclable) and easy to maintain to guarantee your door in an optimal condition.

Thanks to the great flexibility of the IDA system and the possibility to combine single, double, pivot doors and sliding doors with fixed walls, **you determine the appearance of your interior yourself.**

Our products can be applied to both the residential and the commercial market.

MAKE YOUR HOME UNIQUE WITH PERSONALIZED WALLS AND DOORS

APPEARANCE

The front of the profiles are very **detailed in relief** to get an industrial look. The backside of the doors has a sleek and flat profile. You can opt for real intermediate styles or for glued-on ornamental bars. With the latter you can opt for large glass sections and choose the subdivision yourself by placing the profiles wherever you wish.

front view : relief

backside view : flat

FIXED WALLS

## HINGED DOORS

With our hinged door there is a choice between single or double doors and **visible or invisible hinges**. Make the division yourself: an industrial look with more profiles or a sleek look without intermediate profiles.

visible width	as from 33 mm
visible width transom	40 mm
glazing	8 - 10 -12 mm to choose
hinges	visible or invisble (adjustable)
single door	<input checked="" type="checkbox"/>
double door	<input checked="" type="checkbox"/>
fixed wall	<input checked="" type="checkbox"/> free subdivision
anti-draught brushes at the bottem	with or without
closure	door lock or magnetic closure
colour	various powder coating colours with a 25-year guarantee

## PIVOTDOORS

Besides the aesthetic aspect, our pivot doors are very user-friendly when placing as **the pivot system is integrated in the bottom profile**. So there is no need to grind in the floor and you avoid the risk of damaging the underfloor heating. Ideal when renovating a home!

Doors can, if desired, turn in both directions with a "hold position" at 0 ° and at 90 °. You can choose between a floating pivot door or one with a frame. An outer frame offers a thermal and acoustic improvement.

frame	floating or with frame
glazing	8 - 10 -12 mm to choose
maximum width	2 meter
closing system	standard safe soft close system
anchoring	only 4cm in the floor
visible width	as from 33 mm
colour	various powder coating colours with a 25-year guarantee

## SLIDING DOORS MODERN AND INDUSTRIAL

Choice between a sliding door in a **modern or industrial look**. The modern look has a sleek and discreet system with invisible wall mounting. The industrial look has a vintage sliding door fitting that gives a cool accent and is equipped with large wheels to roll softly and gracefully. Both are space-saving because you no longer have to take a turning angle into account.

glazing	8 - 10 -12 mm to choose
maximum width	1,5 meter
closing system	softclose
visible width	as from 33 mm
rail	sleek or vintage design

## FIXED WALLS IN COMBINATION WITH ALL DOORS

The glass IDA walls ensure a stylish partition in your home, office or restaurant. They offer an acoustic shield and allow fully light to enter. You determine the layout of the profiles yourself. Can be combined with all doors.

## DOOR HANDLES

UNIVERSAL L-handle for hinged door

RURAL L/T-handle for hinged door

L-handle for pivot door

OPEN handle for pivot door

## OPTIONAL DOOR LOCK WITH KEY WITH FLAT LATCH

### Did you know?

Optional door lock with flat latch. This only comes out when it's on the same height as the closing plate, which is also minimally visible. The door can thus be opened or closed almost completely silently.

## MODERN RAIL

## INDUSTRIAL RAIL
